

SURGICOLL-MESH® (Membrane Form)

Innovative Technology Product For Treatment of Diabetic Foot Ulcers

Non-healing Diabetic Ulcers could be Healed Faster by this NANOTECHNOLOGICAL approach!

Surgicoll-Mesh® (Membrane Form)

Surgicoll-Mesh offers clear advantages over synthetic and other collagen products for the treatment of Diabetic Foot Ulcers. It acts as a scaffold that can be naturally and progressively integrated, remodeled and eventually replaced by functional host tissue.

Efficacy of Surgicoll-Mesh is proven by formation of new blood capillaries within 4 to 5 days which results in remarkable healing of the wound!

Debrided Wound - Day 0

Upon Surgicoll-Mesh Application

31 Days Post Application
